

Bora KOCABIYIK

Computer Engineering Student

Ankara, Turkey

+90 507 189 1858 | borakocabiyik@hotmail.com | [LinkedIn](#) | [GitHub](#)

Computer Engineering student with strong interest in technology and hands-on experience in full-stack development. Aiming to work on impactful software projects and contribute to innovative solutions in the tech industry.

CORE COMPETENCIES

- Cross-platform Flutter development
- Frontend-backend feature design
- Scalable UI/UX component development
- System integration & device communication
- Software reliability, debugging, testing, and maintainability
- Collaborative development & cross-team coordination

PROFESSIONAL EXPERIENCE

WELLBODYTECH

Full-Stack Developer

(Office) Ankara, Turkey

July 2025 – Present

- I contribute to the development of **WellBodyTech**, a desktop health & fitness assessment platform that delivers accurate evaluations and personalized training programs. My work involves implementing core features of the **Flutter Desktop application**, developed and optimized for a **Ubuntu** environment.
- I collaborate across both the **frontend and backend** layers, designing scalable **UI/UX** components while extending or adjusting **API** behavior as new features require. This includes improving interaction flows, refining **data handling**, and collaborating closely with the **development team** to maintain a consistent and maintainable product architecture.
- I also support the integration of **BLE-based measurement devices** into the system, contributing to device communication flows and to the setup of the **hardware hub** that connects sensor data to the application. By contributing to both software and device-level integration, I help deliver **reliable, future-ready** solutions aligned with the company's vision for **next-generation fitness technology**.

TURKCELL

Intern

(Hybrid) Istanbul, Turkey

July 2024 – August, 2024

- Developed a responsive full-stack web application using **React TS**, **.NET**, and **MSSQL** while improving code quality through daily mentor reviews and actively contributing to **Agile** workflows with **Git** usage.

3T BILISIM TEKNOLOJILERI

Software Application and Support

(Office) Istanbul, Turkey

July 2023 – September, 2023

- Delivered high-volume remote support for hotel management software by resolving **100+ tickets**, performing advanced troubleshooting, and creating an internal issue-tracking database that improved recurring problem resolution.

EDUCATION

ANKARA UNIVERSITY – BSc in Computer Engineering

GPA: 3.40/4.00

Ankara, Turkey

Expected July, 2026

LANGUAGES

• English (Advanced) • Turkish (Native) • German (Beginner)
